

I am writing to encourage you to keep FM translators instead of switching to LPFM so that my area can continue to receive K-Love radio signals. This station has had a great impact on my family allowing us to listen to quality radio as a family. It has allowed me the comfort of knowing that my small children can listen to music that is positive and uplifting and I never have to worry about what the lyrics may be saying or implying because all of the music contains words that I want my children to hear and learn. K-Love has also been very beneficial to the students that I teach because there are times when the radio is on and the positive message of K-Love is reaching them. I also believe it is in the best interest of the community to have K-Love on the air. I know that there have been many times when I have gone into store and heard radios that were on K-Love and just felt more relaxed. Please continue to allow FM translators to broadcast stations such as K-Love. Thank you for your time.

Sincerely,

Darcy Dietz
